Latest Projects

Project : B360 (Business 360)

Client : Verizon

Team Size : 5

Role : Team Lead

Environment : Spring Boot, Redis, Angular 9+ Duration : 2019 June to till date

Role:

Write Apis and consume Other API Calls (Spring boot and angular). Develop UI using Angular

Taking ownership of Jira Stories.

Project Profile: B360 – Verizon E-Commerce Platform Overview

B360 is a Verizon-based enterprise e-commerce project designed to manage and streamline multi-channel order processing and customer interaction. The platform supports various sales and service channels to ensure seamless ordering, customer care, and business operations across different segments.

Objective

The primary objective of B360 is to provide a unified system for handling customer orders, sales operations, and partner integrations through multiple business channels, improving efficiency, accuracy, and customer experience.

Key Channels in B360

1. Care Channel

The Care channel is primarily focused on customer support and order management.

Handles customer inquiries and support requests

Maintains complete order details and history

Ensures resolution of customer issues related to orders, billing, and services

2. Retail Channel

The Retail channel operates as a physical store-based sales system.

Sales representatives interact directly with customers

Customers can purchase products and services in-store

Focuses on direct customer engagement and

assisted selling

3. Telesales Channel

The Telesales channel manages order placement via phone communication.

Orders are booked over calls by sales agents

Suitable for remote customers who prefer assisted ordering

Helps in upselling and cross-selling Verizon products

4. Indirect Channel

This channel involves third-party partners and external vendors.

Orders are placed through authorized external agents

Expands Verizon's market reach through partnerships

Ensures indirect sales flow into the B360 system

5. B2B Channel (Business-to-Business)

The B2B channel supports corporate and enterprise customers.

Bulk ordering for business clients

Customized pricing and enterprise solutions

Dedicated support for large-scale business requirements

We done following project under B360

Project : My solution

Client : Verizon

Team Size : 5

Role : Team Lead

Environment : Spring Boot, Redis, microservices

,Angular 17 Duration : 15 months

Role:

Taken ownership of complete project. Metting with clients and other subsystem owners for requirement gathering on project. Understanding Stories uses, explaining to team members distributing stories based on team's skills.

About Project: A personalized recommendation system designed to enhance customer purchasing experience by analyzing buying capacity and purchase history. Based on these insights, the system suggests suitable devices and provides targeted offers at the time of order placement, making purchasing decisions easier and improving conversion rates.

Project : Guided Promo

Client : Verizon

Team Size : 5

Role : Team Lead

Environment : Spring Boot, Redis, microservices
,Angular 17 Duration : 8 months

Role:

Taken ownership of complete project. Meeting with clients and other subsystem owners for requirement gathering on project. Led the development and coordinated with stakeholders for requirement analysis. Managed task allocation and ensured smooth delivery of features within timelines.

About Project:

A promotion engine that delivers personalized offers based on device selection and Sales Representative (Rep) ID, ensuring targeted and effective promotions aligned with sales strategies.

Project : National Offers

Client : Verizon

Team Size : 5

Role : Team Lead
